

# Houston Area Cooperative on the Gifted and Talented

---

Thank you for attending our GT professional development session today. We understand that things don't always work out the way we plan. Sometimes these unforeseen complications result in a person being late to a professional development course. GT training is state mandated and includes a specific time requirement. As a result, we are very careful about the length of our training sessions. When a person is more than 15 minutes late, we cannot award full credit for the class. Please contact the person responsible for the GT program in your district to discuss the possibility of making up the time you missed in order to receive full credit for the day or perhaps receiving partial credit. The GT contact person in your district is the person who makes decisions regarding your credit for this session.
